Silent Leaks

Unless you have reasons that your water usage would be higher during this time, we recommend that you check your home for water leaks

- Put a few drops of food coloring in your toilet tank(s); if the color gets into the toilet bowl (without a flush) - you have a silent leak.
- Read your water meter (and write it down) before retiring at night, in the morning before you use any water, read the meter again, if there is an increase in the number, you have a leak.
- Have you had visitors? We tend to see higher water usage during the holidays
- Have you been watering your lawn / garden?
- Do you have a water softener that may be cycling too often?
- Do you have an ice maker that may be cycling too often?
- Is your toilet running?
